

Daminion can import AutoCAD DWG and DXF files, but it is visually difficult to find the drawing you want because the default preview of these files is an icon, not a thumbnail.

However, if you download and install on Daminion Server, the free [DWG TrueView](#) from the AutoDesk you will be able to view thumbnails of your AutoCAD DWG and DXF files.

*Note: DWG TrueView 2023 requires 64-bit Microsoft® Windows®, Windows 10 version 1809 or higher, Windows Server 2022. For other Windows versions you need DWG TrueView 2022.*

AutoCAD thumbnails that still appearing as default icons can be rebuilt in the following way from the Daminion menu: Item → Update Thumbnail (Ctrl + B).

If the thumbnails are still not displayed, make sure Windows is set to display thumbnails:

1. Go to the Windows *Control Panel* → *Folder Options* → *View* tab.
2. Uncheck “Always show icons, never thumbnails” and click *OK*.

*Note: If you still have trouble displaying thumbnails, check out this [article](#)*

After that, rebuild the thumbnails by selecting the files and clicking Ctrl+B in Daminion.
