Create PDF Contact Sheet

Description:
This functionality allows users to create a PDF contact sheet.

Desktop:
The "Create Contact Sheet" option is inactive in the "File" menu. Right-clicking on a media item and accessing the "Item > Export" menu does not activate the "Export to PDF" option.

Edit Export Preset

Description:
This functionality allows users to edit export presets.

Desktop:
In the "Export > To Folder, CSV" options, there is no ability to edit presets in the "Transform" section (Customize).

Web:
The "Export Presets" option is not available in the "Settings" menu. There is no "Batch Download Limit" setting in the "Advanced Settings" menu.

Export Files

Description:
This functionality allows users to export files.

Desktop:
Right-clicking on a media item and accessing the "Item > Export" menu does not activate the "Export to Folder" and "Export to PDF" options.

Web:
In the kebab menu for a media item in the thumbnail view, only the option to download the original file ("Download Originals") is available. The "Export to PDF" option is not accessible.

Export Items to CSV

Description:
This functionality allows users to export files to the CSV format.

Desktop:
Right-clicking on a media item and accessing the "Item > Export" menu does not activate the "Export to CSV" option.

Export Tag Structure

Description:
This functionality allows users to export the tag structure.

Desktop:
The "Export Tags" option is inactive in the "Catalog" menu.
