

Edit Auto-Rescan Settings

Description:

This functionality allows users to edit auto-rescan settings for a folder.

Desktop:

Right-clicking on the value of the “Folders” tag does not activate the “Switch Auto Rescan On/Off” options.

Relink Folders

Description:

This functionality allows users to change the linked folder for a file.

Desktop:

Right-clicking on the value of the “Folders” tag does not activate the “Relink Folder” option.

Rename/Move Folders. Change Folder Structure

Description:

This functionality allows users to rename/move folders and change the folder structure.

Desktop:

Right-clicking on the value of the “Folders” tag does not activate the following options:

- Locate in Explorer
- Create Sub-Folder
- Rename

Rescan Folders

Description:

This functionality allows users to rescan folders for changes.

Desktop:

Right-clicking on the value of the “Folders” tag and accessing the “Catalog” menu does not activate the “Rescan Folders” option. (F6 hotkey does not work)
