

PDF preview option allows you to open your PDF files directly in your web browser without having to download each PDF file to view its contents.

Open your web catalog and locate a PDF file you want to preview.

Click the PDF file you want to preview to open it in full screen.

In the upper caption bar, locate the “PDF” icon and click it to preview your PDF file in the web browser.

If your files are stored in Daminion cloud, the time of loading the file will especially depend on the file size and your Internet speed.
